Rationale

Why Dictionary for Books?

- **Fast Lookup**: O(1) time complexity for book operations using ISBN as key
- **Unique Identification**: ISBN naturally serves as a unique identifier
- **Efficient Updates**: Direct access to modify book details

Why List for Members?

- **Simple Management**: Members don't need complex lookup operations
- **Flexible Structure**: Easy to add/remove members
- **Order Preservation**: Maintains insertion order if needed

Why Tuple for Genres?

- **Immutability**: Prevents accidental modification of valid genres
- **Memory Efficiency**: More efficient than lists for fixed data
- **Data Integrity**: Ensures genre consistency across the system
